

Honeysuckle Farm

Kansas Troubles Quilters

I don't have much of a green thumb, but I do enjoy digging in the dirt, planting a seed, and waiting to see what happens. Years ago, we planted a wildflower garden along a row of sandhill plum bushes. I was excited to see a few blooms the first year and hoped for more the following year. Unfortunately, only a few scattered, straggly flowers appeared. After about 4 years, Robert commented on the variety of "weeds" growing along the bushes. Amazingly, those "weeds"

were the wildflowers we had sown years before! Now, when Robert remembers to avoid mowing my "weeds", I love clipping a handful of blooms for an impromptu bouquet. If you're like me (a better piecer than a gardener) my **Honeysuckle Farm Sampler** quilt ensures I'll have beautiful flowers to enjoy all spring & summer. Traditional piecing with a bit of fusible applique for fun.
