

This is Sarah Watts' second ode to the Sunshine State. This time she focused on scenes from Florida's world renowned beaches - dolphins, sand pipers, coral and fish all make appearances. Sarah's Sunshine Panel is a versatile, fat-quarter-sized set of designs that can be used in a variety of projects. Three colorways of a gorgeous rayon are begging to be made into beach coverups, and the Gator canvas is a cheeky spin on a more traditional damask. **See panels, rayon & canvas on following spread.
